THE CODE FOR DENMARK USES THE FOLLOWING DATASETS:

- dar.dta - AVAILABLE FROM STATISTICS DENMARK
- idanupd.dta - AVAILABLE FROM STATISTICS DENMARK
- idapupd.dta - AVAILABLE FROM STATISTICS DENMARK
- idasupd01.dta - AVAILABLE FROM STATISTICS DENMARK
- rasupd02.dta - AVAILABLE FROM STATISTICS DENMARK
- uddaupd01.dta - AVAILABLE FROM STATISTICS DENMARK
- Education Codes.xlsx - INCLUDED IN THE REPLICATION PACKAGE
- list_of_municipalities_in_functional_urban_areas.xlsx - INCLUDED IN THE REPLICATION PACKAGE
- nuts3.csv - INCLUDED IN THE REPLICATION PACKAGE

To replicate all results, it is sufficient to run the Stata programme "0RUNME.do". This will create additional folders and intermediate files. The role of each subprogramme, contained in 0RUNME.do, is explained in the programme. Before running the programme, you need to create a working folder and save all the datasets and do-files in it (for example "J:\Workdata\707927\REPLICATION"). Please replace the command at line 17 of 0RUNME.do with your location.
