

APPENDIX

TABLE A1: SUMMARY STATISTICS FOR DATA USED IN TABLES 7 AND 8

	Obs.	Mean	St. Dev	Min	Max
Hunting licenses (in 000s)	3,651	427.36	435.41	.06	3143.23
Hunting license holders (in 000s)	2,692	306.12	243.81	5.22	1313.19
Hunting license revenue (000s of 2018\$)	3,746	11576.11	11597.43	47.76	185270.1
Average hunting license price (2018\$)	3,650	33.92	54.04	4.51	1665.55
National PR (000s of 2018\$)	3,450	190668.7	95816.36	11404.13	362333.3
Population (in 000s)	4,100	3959.79	4483.29	84.23	36580.37
Income per capita (2018 \$)	3,908	24491.25	12262.03	2252.12	68377.1
Fixed share indicator	4,100	0.08	0.27	0	1
PR1	4,100	0.83	0.37	0	1
PR2	4,100	0.42	0.49	0	1

Notes: The data span 1925-2008. Some years of data are missing for some variables. These variables represent the annual number of licenses sold, the number of individual license holders, and the total revenue from hunting license sales. The data for 1958 and later come from www.fws.gov/wsfrprograms/Subpages/LicenseInfo/Hunting.htm. The data for 1925-1957 were obtained from the USFWS. License holders is total hunting revenue divided by number of licenses sold. The population data come from the U.S. Census Bureau. The per capita income data come from the Bureau of Economic Analysis. The fixed share indicator equals 1 for the five states that have received the minimum proportion of Pittman Robertson allocations in the past 30 years. These states are Delaware, Hawaii, New Hampshire, Rhode Island, and Vermont. PR1 equals 1 for 1939 and later, which are the years in which Pittman Robertson money was allocated to the states. PR2 equals 1 for 1972 and later, which are the years in which the Pittman Robertson handgun amendments were in effect.
